Programme Highlight:

What does “High Performance Buildings” actually mean? Recognising the increasing awareness of this hot topic, CIBSE would like to share the latest news and experiences about that in the Building Services Engineering in Hong Kong.

CIBSE have taken the lead in promoting good building services design and practices in achieving high performance buildings and also recognition of engineering excellence in sustainable built environment. Building performance aspects contribute to built environment include energy management and performance, occupation satisfaction and comfort throughout the operating life. This Seminar we have invited different engineering professionals whose common experience lies in their initiatives to develop, practice and drive the building energy efficiency to high performance.

Our invited Speakers would share their experiences in various aspects and the latest development of building energy efficiency initiatives in Hong Kong. We believe that their knowledge sharing, practical experience and insight would be beneficial to our engineering industry.
